# Two-Step Equations

**What do you call a number that can't keep still?**

Match your answer in the solution bank to find the letter for each blank.

Solve each equation for x.

Solution Bank

(108)  $-x + 9 = 4$

(105)  $5x - 2 = 13$

(104)  $-2x + 10 = -6$

(106)  $\frac{x}{3} + 5 = 9$

(102)  $2x + 8 = 28$

(109)  $6x - 10 = 2$

(103)  $4x + 1 = 25$

(107)  $\frac{x}{2} - 4 = 5$

(101)  $3x - 5 = 16$

## Two-Step Equations

**What do you call friends who love math?**

Match your answer in the solution bank to find the letter for each blank.

Solve each equation for x.

(201)  $2(x - 3) = 14$

(205)  $\frac{x}{4} + 3 = 1$

(208)  $\frac{2x + 1}{-3} = -5$

(207)  $\frac{x}{5} - 6 = -3$

(204)  $5(x - 4) = 5$

(206)  $\frac{x - 2}{3} = 4$

(202)  $3(x + 2) = -15$

(203)  $4(2x - 1) = 28$

# Two-Step Equations

What do you call a crushed angle?

**A RECTANGLE**

| Solve each equation for x.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 | Solution Bank                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |          |        |    |     |    |     |    |     |   |     |    |     |    |     |      |     |      |     |    |     |    |     |    |     |    |     |
